SUMMARY

Software engineer with 2+ years of professional experience building production web and mobile applications, and integrating AI and automation into real business workflows. Turns Figma designs into production-ready interfaces in Flutter, React, and Next.js, and connects them to REST and third-party APIs. Has shipped systems across insurance, HRIS, POS, events, and queue management, plus AI chatbots and automation pipelines built with Dify and n8n.

SKILLS

Frontend & Mobile: React, Next.js, Vue.js, Angular, Flutter, React Native, Expo, TypeScript, JavaScript, Dart, Tailwind CSS, Bootstrap, HTML/CSS

Backend & Data: Node.js, Django, Python, REST API design and integration, MongoDB, Supabase, MySQL, MS SQL, Firebase

AI & Automation: Dify, LangChain, OpenAI API, RAG, Hugging Face, Google Colab, n8n, UiPath, IBM RPA, Webhooks

Tools & Practices: Git, GitHub, Figma, Adobe XD, Oracle APEX, VS Code, Agile/Scrum, code review

EXPERIENCE

Software Engineer | *Qymera* June 2024 – Present

- Build web and mobile applications in Flutter, React, Vue.js, Next.js, and React Native, translating Figma designs into production-ready, responsive interfaces.
- Delivered frontends for insurance platforms, HRIS tools, event management, weather, admin dashboards, chatbot interfaces, blockchain, and queue management systems.
- Integrate REST and third-party APIs to power real-time data and end-to-end user workflows.
- Build AI chatbots and multi-step AI workflows in Dify for both internal tooling and client-facing products.
- Automate business processes with n8n — including loan processing, insurance claims handling, and ordering pipelines — removing manual handoffs from day-to-day operations.
- Contribute backend work in Node.js, MongoDB, and Django where projects require it.
- Work in agile cycles: code reviews, ticket management, and collaboration via GitHub; shipped a working chatbot in a 3-day hackathon.

Frontend Developer Intern | *Expand Enterprises Inc.* March 2023 – July 2023

- Developed dynamic web applications using the Angular framework, improving usability and functionality for internal users.
- Integrated RESTful APIs connecting MS SQL databases and Firebase for reliable data retrieval and management.
- Produced wireframes and mockups in Adobe XD to align stakeholders before development began.
- Contributed to Flutter mobile app development and collaborated with cross-functional teams on project workflows.

PROJECTS

- Brewde** — Multi-tenant POS and cafe management system built for a real coffee brand. Merchant onboarding, cart and checkout, PWD/Senior discounts, sales dashboard, and role-based access for Admins, Owners, and Cashiers. *Next.js, Supabase, TypeScript, Tailwind CSS*. brewde.vercel.app
- Jeepney Fare Calculator** — PWA that pulls the national average diesel price and applies LTFRB fare structures to generate a live fare matrix. Interactive fuel-price slider, PDF export, offline-capable. *Next.js, TypeScript, Chart.js*. jeepney-fare-calculator.vercel.app
- Snap and Pose** — Browser-based photo booth producing photo strips and animated GIFs from the webcam, with no install or sign-up. *Next.js, Tailwind CSS, ShadCN UI*. photobooth-app-delta.vercel.app
- Next Day** — Playful prediction app with an animated intro and light/dark themes. *Next.js, TypeScript, ShadCN UI*. next-day-peach.vercel.app

EDUCATION

Bachelor of Science in Computer Science — Technological University of the Philippines, 2023
